GLASS CABINETS & COUNTERS

Glass cabinets provide an effective, accessible way of showcasing products in instances where it may not be necessary or appropriate for customers to be handling them physically. High-value items such as jewellery, electronics and cosmetics can be displayed safely in high-traffic environments without compromising their visibility or desirability.
We have been designing and manufacturing glass cabinets for over 30 years, working alongside retailers to deliver solutions that are optimised to meet their needs.
Our range of glass cabinets can be configured as island, wall-mounted and corner units to maximise the potential of all available merchandising space.
Our glass cabinets and counters can be found in almost every shopping centre in the UK, with many having been in active use for over 15 years. Thanks to the modularity and flexibility of their design, retailers are able to reconfigure glass cabinet display systems alongside changing product promotions, re-brands and store updates.
