

CREO INDUSTRIAL ARTS

CREON

Neon is quickly fading from the architectural landscape for obvious reasons, but CR?O has developed an alternative that replicates the aesthetic of neon using more efficient, environmentally friendly and longer lasting LED technology.
CreonTM uses a combination of LED modules and custom routed acrylic to produce a variety of different styles. We provide both interior and exterior products, all custom built to your specifications. See the images below to get an idea of the many different kinds of CreonTM products we can provide for you.
