

# ERGONOMIC SOLUTIONS

## HEIGHT ADJUSTABLE ARM

The Height Adjustable Arm is an ergonomically designed mounting solution that reduces the possibility of Repetitive Strain Injury (RSI), whilst assisting productivity at the workstation.
Where space allows, the height adjustable arm enables the screen to be raised or lowered to the appropriate eyeline of the operator. It may also be used to mount a keyboard or other peripherals.
The arm is of course fully compatible with our signature SpacePole range of technology mounting solutions and provides rotation on the pole and independently for the screen proving as much flexibility as possible for the user.
The Height Adjustable Arm can be mounted in front of the operator if space permits, (dependent on depth of counter) or to one side with screen located in front of the operator, mounted on the arm.
