

## HALLOWELL

### GUARDRAIL

Designed to safeguard people, property and facility assets from accidents involving material handling equipment

Hallowell Guardrail has been designed, engineered and manufactured to the highest industry standards using heavy gauge steel, and a unique integrated fastening system. This integrated system incorporates the fastening hardware as part of the column design so there will be no 'stripped' out connections. A properly installed and anchored guardrail system is designed to protect your personnel, property, and vital assets from a fully loaded forklift.
