## CASI-MICRO ASRS FOR BOPIS

CASI-Micro ASRS for the buy online pick up in-store (BOPIS)
ASRS stands for Automated Storage and Retrieval System. A critical component of last-mile delivery within your supply chain. It is a variation of computer-controlled material handling systems that automatically place and retrieve items from set high-density storage locations with precise accuracy and maximum efficiency.
Traditional ASRS systems can be complex, daunting, and expensive. They are also usually associated with large warehouses that process thousands of orders per day. If your inventory storage is restricted by space, the CASI-Micro ASRS is the perfect solution. It is designed to fit into your existing footprint without compromising efficiency or adding additional headcount to operate.
