TUBE LINE

Tube Line is an alternative to Maxi for aisle and perimeter wall shelving. The line includes several options for shelves, merchandising accessories, and back panels. Tube Line has a reduced load capacity rating compared to Maxi Line's, but it assembles faster since it has fewer snap-together parts. The line's standard shelves include flush-front tag, diamond-shaped perforations for accessories and slim, multi-position brackets. The T-Rack Fashion and Shoe models are offshoots of Tube Line, and they are perfect for selling apparel and shoes. See the complete collection at www.madixinc.com
