

MARVOLUS

CASE STUDY - MAYTRONICS

Program: Pool Vacuum Display
Benefit: Value Engineering

Client asked us to redesign existing display for reduced cost while maintaining structural integrity.

- We re-engineered the framework to reduce carton pack-out by almost 50%. This is particularly important given unprecedented ocean freight costs and impacts total supply chain efficiency – including carbon footprint
 - Greater than 20% total cost reductions achieved through a series of value engineering efficiencies
 - We are now working on further programs for international distribution.
- See more information at www.marvolus.com
