

PAN OSTON

SLIM FAMILY

The SLIM Checkout solution delivers a front-end checkout with a uniform appearance that seamlessly integrates into your customer journey. It is made with a modular design that gives you the flexibility to customise the in-store checkout and its components to match your desired look and feel. The SLIM has easily recognisable touchpoints including the Core and Smart LEDs to further optimise your customer flow and experience.
Flexible hardware integration is included as a standard integral feature of the SLIM checkout. This makes it possible to integrate independent hardware from any company and to upgrade any of the components as new technology becomes available. In short, the SLIM checkout is a versatile and future-proof solution that meets the needs of every retailer.
