

PRESTOP

DIGITAL WINDOW DISPLAY

Turn your shop window into a digital point of sale. With a window touch solution you can make a store 24/7 available to your customer. On the inside of the window, Prestop assembles a monitor with a PCAP touch foil. This turns the window itself into a touchscreen. The visitor standing in front of the window can make full use of the offered content. This way you can easily extend the opening hours of the shop. See more information at www.prestop.com
