INTERACTIVE MIRRORS

Get in the picture with the interactive mirror.
Anyone who sees our interactive mirror for the first time will be amazed. The combination of screen, interactive software, touch technology and mirrored glass ensures magic. Looking back at a film after doing a pirouette in a wedding dress? This is possible without leaving you with a stiff neck. Tried several items of clothing and want to make a good comparison? Place them under each other in the image in the mirror and compare them at your leisure. Would you like to get a suggestion for other items of clothing via the mirror in the shop? Not a problem. With a fingerprint you can bring your clothes to the fitting room if you wish. The Prestop interactive mirror solutions make the clothing store a real experience room.
