REGISTRATION KIOSKS

Ensuring that visitors follow the right route with the help of a registration kiosk.
Registration kiosks have long been used in hospitals. For privacy reasons, these locations are already kept at a distance and privacy filters ensure that others can't peek along. Of course, the kiosks can be equipped with various peripherals such as document scanners, printers, etc.
Hospitals use registration kiosks from Prestop
For both the AMC and the Amsterdam UMC we designed and produced a unique login kiosk with an edge-to-edge pcap touch screen (full glass on the front). The touchscreen is provided with a privacy foil, so that personal data cannot be read unless you stand in front of the information kiosk.
