TOUCH PEN DISPENSER

Completely contactless and automatic
With a touch pen, you can operate a touchscreen, self-service kiosk, or payment terminal without touching the device with a finger. For this purpose, we have developed a dispenser that automatically releases a touch pen. The touch pen can be taken without contact with the dispenser, so the customer does not have to touch anything with his fingers!
Kiosk, desktop and, wall model
The touch pen dispenser is available in a kiosk, desktop, and a wall model. All products are made of brushed aluminum and the dispenser has a capacity of +-600 touch pens in the large housing and +-250 in the small one. The kiosk and wall models are available with and without a touchscreen, which is ideal for (interactive) signage.
