

SIGNCOMP

IRREGULAR SIGNS

You may think that sign boxes and frames are always manufactured in rectangles or squares, or maybe even the odd trapezoid or parallelogram. With the SignComp Econoflex and Retro Systems almost any shape is possible.
With the 'slot and bend' method, the box or frame can be simply formed to any irregular shape, including letters and logos.
With the internal bracing strip, there is no need for welding or multiply fixings – just bend to your shape and fix either end to the extrusion – simple!
