

T.C. MILLWORK

SMARTWALL®

SMARTWALL® is a UL listed visual merchandising system that utilizes new or existing wall standards to supply power using proprietary low voltage lighting. Power to illuminate an array of merchandise is delivered through the standards to circuitry built into each unit. No need for hard wiring, or any exposed electrical connections; SMARTWALL® is self-contained elegance.

Want to move your shelves vertically up and down and horizontally? No problem, our system is polarity neutral! SMARTWALL® does not require special wiring; only one duplex outlet is needed every 20 feet.

Want shelves can be stored flat, with totally independent brackets that handle the same or more weight as any shelf on the market. This includes industrial gondolas used in grocery and office stores.
