T.C. MILLWORK

VEN4MA® — 3D FILMS

Ven4ma? is a product TC Millwork designed for the healthcare industry to provide impact resistant, anti-microbial finishes that could be used for crown molding to wall protection, to crash rails and corner guards.

Laminates are great— if you are flat laminating and don't have to worry about edge-banding. Ven4ma can be flat laminated, miter folded, vacuum pressed and formed making them durable and versatile.

We can match practically any laminate (and if you have enough quantity we match any laminate or veneer) with a 3D film alternative that will allow us to lower costs, improve durability and do away with unsightly (and prone to blow-out) black lines.

TC Millwork has been at this since the 90's, and most film manufacturers recommend us to lay up their films because we have the experience and technology to show their films in the best light.
