

UNIBOX

INTEGRATED LIGHTING

There are multiple things to consider when illuminating interior surfaces, graphical display systems and built-up structures.
How will lighting elements be housed? What cabling will be required? What thermal management solutions will be employed? How will safety standards be met?
At Unibox, we have over 10 years of experience in creating integrated lighting for applications of all types. Our in-house electrical engineers work collaboratively with designers and contractors to ensure that we provide solutions that are optimised to perform according to their functional, aesthetic, environmental and logistical requirements.
