

UNIBOX

RETAIL SHELVING

Shelving systems are an essential feature of retail spaces. They need to offer visual merchandisers the flexibility and creative freedom they need to ensure their brand keeps pace with changing trends, seasonal promotions, product launches and consumer values.
Aluminium-based, modular shelving systems are ideally suited for use in retail environments of all types, offering impressive sustainability credentials and allowing for product displays to be updated alongside instore campaigns.
At Unibox, we work in partnership with an international network of retailers, design agencies and visual merchandising specialists to develop future-proof shelving systems for store environments of all types.
