

VISPLAY

INVISIBLE 6 P/L

Invisible 6 P/L is the electrified version (24 V) in the Invisible Design® family – a horizontal system that can be used to give unique structure to your walls. Stabile aluminium profiles form the basic element of this system. You have a choice of two installation options: either the profiles are mounted directly on the wall – or you can use our flexible Invisible Change uprights as a substructure into which profiles can be easily inserted. Wooden panels are secured between the profiles using mounting clips. The individual panels and the intervals between profiles can be adjusted quickly and without tools – giving your display a completely new appearance!
