KADO 15

Kado 15 is a structural shelf system that offers a striking stage for a wide variety of displays. It allows virtually unlimited configuration options – for wall, mid-floor or ceiling zones. The basic system is made of metal, which can be coated in a choice of colours.
The special characteristic of Kado 15: slimline square tubes measuring 15 x 15 mm. The open structure can be partly or entirely closed through the addition of individual panels. Kado 15 installations may be extended in all four directions, as needed, with the aid of shelf frames. Simple assembly, dismantling and reconfiguration allow rapid modifications. The structures can be easily integrated into any setting, whether in fashion retail, office environments, health & beauty stores, pop-up shops or window displays.
