

VISPLAY

QUBO 25 P/L

Qubo 25 P/L is an electrified shelving and structural system. It can be used to create appealing wall displays and mid-floor installations: whether as cubes, shelf units, tables, plinths or gondolas – the choice is yours. The basic system consists of sturdy square tubes, measuring 25 x 25 mm, which can be coated in a choice of colours. Shelves are available in a number of materials: glass, wood or colour-coated metal.
The electrical rails are integrated in the frame and therefore concealed. Merchandise supports with LED lighting are then automatically powered when inserted. Digital devices, electronic shelf labels and other elements can also be easily connected to the 24 V electrification. You can also hook LED spotlights into the frames.
