XERO TWIN P/L

Xero Twin P/L is an electrified version of the wall display system Xero – designed for use on walls and in mid-floor installations. The system is based on vertical aluminium profiles. There are two installation options: either the profiles are mounted on wooden panels or they are attached to the wall using a suitable substructure. Panels fitted with the Xero profile can be hung on the substructure with the aid of mounting sets. The panel elements can therefore be easily replaced to give your interior a new look. The special feature of Xero Twin P/L is its double slit: this enables two merchandise supports to be hooked in side by side. Alternatively you can use a merchandise support with a central arm. This allows a fixed axis or cross-axis display.
